

POSITION: CHIEF TECHNICAL OFFICER

REPORTING TO: CHIEF EXECUTIVE OFFICER

ABOUT THE COMPANY:

- Demshi Investment Holdings (Pty) Ltd is a registered Namibia private company with focus in the mobile telecommunication sector. Demshi Investment Holdings (Pty) Ltd is currently rolling out a country wide public Wi-Fi network in Namibia, starting with the City of Windhoek, in order to provide fast, reliable and affordable internet services in Namibia through a world class wireless network.

PURPOSE OF THE JOB:

- to acquire the services of a driven and energetic person with the requisite technical skills, business sense and leadership abilities to develop, implement and shape Demshi Investment Holdings (Pty) Ltd wireless technology vision at an Executive level.

RESPONSIBILITIES:

- Co-ordinate the development and implementation of the wireless network plans and other related internet services which includes deciding on the network expansion, design and network implementation schedules.
- To develop and implement a network strategic and operations plan in order to manage all the design and built of all network components.
- Oversee the selection and contracting for network related equipment and services. To ensure that the company leverages the business opportunity with vendors to maximize the planning and support services included in vendors offerings.
- Oversee and ensure network availability at any given time according to the Service Level Agreements of network uptime. Ensure that network performance statistic and analysis are produced to understand the network health and institute corrective measures.
- Ensure overall network security, reliability, resilience and disaster recovery planning
- Generally, to oversee all facets of the network operation and support infrastructure for billing, CRM etc.
- Discover and implement new technologies, services and products that will yield competitive advantage in the market place and meet customer's expectations.

- Develop and manage Demshi Investment Holdings (Pty) Ltd information technology programs designed to support the day to day functions of the company including hardware, software, systems administration, user support and security.
- Develop external relationships with various stakeholders both national, regional and international.
- Formulate and review of technical policies and strategies.
- Contribute to the overall company strategy and policy making by advising the CEO on the technical implications of decisions.

REQUIREMENTS:

- Wireless and networking industry experience, preferably experience gained from working for an operator.
- Sound understanding of business fundamentals from an operator perspective.
- Track record of delivering technology related business outcomes across a large complex portfolio.
- Understanding of budgeting, business planning and project management.
- Ability to conduct technological analysis and research.
- Excellent communication skills and strategic thinking.
- Leadership and organizational abilities.
- Computer Science graduate or related field.
- MBA qualification is a plus.
